

Manufacturing Technique

Our Special Ceramics Formula

Utilizing locally sourced materials like kaolin, quartz, and china clay, the company conducts rigorous lab testing to ensure eco-friendly and consistent formulations for sustainable manufacturing.

Special Clay Formula

The ceramics are engineered to withstand high temperatures (1300°C) through an oxidized firing technique, resulting in vibrant colors and durable products.

Four Forming Methods

The company offers diversity in crafting ceramic shapes by utilizing various methods such as jiggering, ram pressing, low-pressure casting, and high-pressure casting machines.

Durability, Water Absorption Rate and Consistency

The ceramics have a low water absorption rate (0.5%) and a fully vitrified body, making them resistant to stains. Medium thickness provides a balanced hand feel and durability.

High Firing Temperature

Firing at 1300°C in oxidized conditions produces restaurant-grade ware with sophisticated glazes, ensuring both functionality and aesthetic appeal.

Water Recycle Plant

Loveramics implements advanced recycled water plants, reclaiming and treating water used in production.

This sustainable approach minimizes water waste by recycling and purifying discharged water, repurposing it within the facility.

The system reduces freshwater consumption and prevents untreated water release, showcasing a commitment to environmental responsibility and resource conservation.

Re-use of Heat Energy

Loveramics maximizes energy efficiency by capturing excess heat from kilns and redirecting it to power drying lines.

This innovative system optimizes thermal energy use, reducing reliance on external energy sources.

By repurposing waste heat, Loveramics minimizes its carbon footprint, demonstrating a commitment to sustainability and resource efficiency in ceramic production.

Inspection & Packaging

Each product undergoes 100% inspection by experienced laborers. Our 100% recyclable plant-based paper box packaging aligns with our commitment to sustainability.

Warehousing and Logistics

Operating from 4 global warehouses, we ensure local shipping and minimize import duty, prioritizing proximity and efficient logistics to serve customers worldwide.

Solar Panel

We install solar panels on top of the production site to try to re-use energy as much as possible.
